

CE Lighting

Our **ECO-FL00D** is a high quality low energy moulded fluorescent floodlight with a good output suitable for signage and small area floodlighting in the 26w version but is also available in 42w version for those applications where a higher light output is required.

The ECO/FL00D has been designed to meet all expectations of IP65 and BS 4533 EN60598.

Available in 26W and 42W versions in either black or white.

Constructed from UV stabilised polycarbonate, it is built to last and will not brittle or discolour.

The fitting can be fixed directly to a wall, or it can be a back light (signage) with the ARM 500 Signage Extension Arm complete with wall fixing bracket in white or black.

Dawn to dusk photocell option is also available.

High quality, energy efficient compact fluorescent floodlight.
