

# CE Lighting

**Our Claude Streetlight** is a state-of-the-art luminaire family can be deployed in virtually every public lighting location; from cycle-routes to streets and squares with high traffic densities. Also for pedestrian precincts or car-parks.

## Features:

- Compact, high-pressure die-cast aluminium body.
- Flat or convex glass or shock-resistant polycarbonate diffuser.
- The carefully constructed aluminium reflector gives optimal light distribution and high efficiency. The lampholder/reflector has a choice of four positions, which gives an optimal solution for a wide range of applications.
- Installation without tools. Integral gear on separate tray. Automatic power off when the luminaire is opened.
- RELUX software for lighting calculations.

The luminaire can be mounted directly onto tubular arms ( $\varnothing$  42-60 mm) and post-tops with accepted diameters or with a stub tube as a luminaire accessory. An added property of the luminaire is the facility to adjust it in the vertical plane by up to  $15^\circ$ .

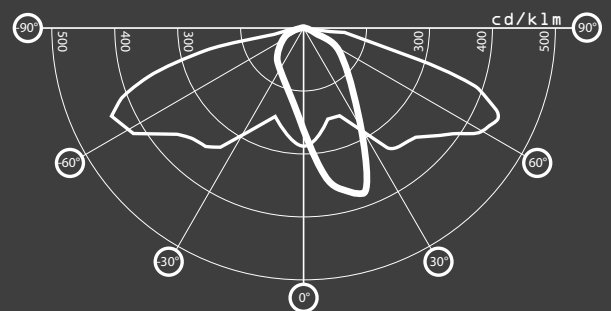

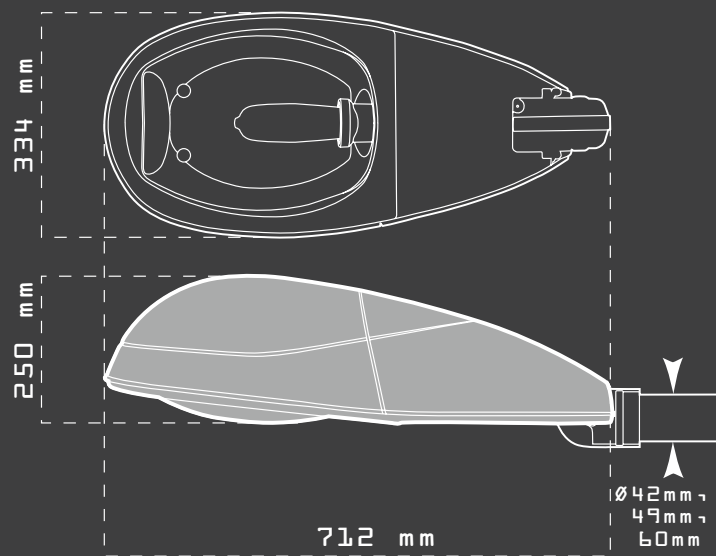

Electrical safety class: I.

Nominal voltage: 230-240 V, 50 Hz

Degree of protection: IP66, both in the optical and electrical compartments

Weight: 7,1-12,7 kg

Nominal wind area: 0,083 m<sup>2</sup>

High quality, energy efficient streetlight.
