

Our Naples Streetlight is a state-of-the-art die-cast luminaire family for roads, parks, pedestrian zones and industrial areas.

Features:

- Grey powdercoated
- 5mm tempered heat and shock-proof glass with silicone gaskets.
- Multi-faceted street optic in pure brite 99,85% and high-efficient aluminium.
- Max installation flexibility thanks to the adjustable lamp holder.
- Fitting suitable both for installation on horizontal and vertical poles, with diameter from Ø 60mm to Ø 76mm.
- Fitting inclination: from -5° to +15° on vertical pole and from -15° to +5° on horizontal pole.
- Body opening system by a front clip.
- Thermo-plastic switch.
- Streetlight in insulation class II.
- Insulation class I on request.
- Protection degree IP66.
- Fitting provided with power reduction device realized by the commutation of inductances into the fitting by power commutators that need the insertion or the cutting off in the control phase. The power commutation works without turning the discharge lamp off and it does not influence its life.
- Fittings provided with electronic ballast: with capacitor and starter incorporated, available also for the use of the compact metal halide lamp Philips Cosmo White CP0-TW.

High quality, energy efficient streetlight.
